

Deb Fredrickson

Watertown, SD

I am the Director of Computer Services for the Watertown School District, Watertown, SD; we have the longest running 1:1 program in the state of SD, and an incredibly technology driven curriculum across the district. We could not achieve our level of integration or academic accomplishments without the help of E-Rate funding specifically for our district, and that portion used by the state DOE to provide the bandwidth, equipment and network necessary to drive this--allowing our students to be prepared to succeed in the current economy and world.
